

New York Stock Market

New York, September 19.—A distinctly heavier tone developed to-day in the securities market. There was a renewal of selling on a heavy scale. The movement seemed to represent, in the main, the influence of two factors—the foreign situation and domestic political conditions. The advance of the German bank rate from 4 to 5 per cent. was in no sense a surprise, and seemed to have been fully justified by recent events. The weekly statement reports that last week the bank lost \$1,250,000 in gold, and increased its discounts by \$12,700,000. Private bankers had anticipated the change in the rate by raising the private discount rate materially above the official minimum of the bank of Germany. Within the last four years the rate has been raised above 5 per cent. seven times. The increase of to-day, however, served to draw attention to the existing tension in foreign monetary affairs, and the unfavorable effect which it exercised on European markets was felt in the market for the day's selling. An indication of the nature of this selling may be found in the fact that of the three stocks to fail to new records for the year, two of them—United States Steel and International Harvester—were issues of the corporations mentioned most frequently in Wall Street reports of expected anti-trust proceedings. The definite indication that the administration's attitude toward corporations remains unchanged was disappointing to those who hoped for some intimation of a more complaisant attitude.

The selling of United States Steel was especially heavy late in the day, blocks of 1,000 to 3,500 shares being thrown on the market. The price fell 2-1/2 points to 65. International Harvester sold at 100 3/4, a loss of 1-1/4. The third issue to reach a new low point was amalgamated Copper, which declined 2-5/8 to 53 3/4. The pressure against United States Steel was due in part to the belief that conditions in the industry are at low ebb. Operations of the United States Steel Corporation since the first of the month have fallen far below the corresponding period in August. Low prices were responsible for the heavier business last month, but though price cutting continued, the volume of business continues to dwindle, and the margin of profit has been reduced so largely that earnings of many of the steel companies are undoubtedly low. One estimate of the earnings of United States Steel for the current quarter was \$110,000,000, as compared with \$141,000,000 in the same period of last year.

Opening prices of stocks were generally lower, with some losses as much as a point. From these declines there were subsequent rallies, but the undertone was at all times uncertain. The heavy selling of the last hour sent down prices generally from 1 to 2 points, with larger losses in a number of cases.

The bond market was steady. Total sales, par value, \$1,754,000. United States bonds were unchanged on call. Total sales for the day, 423,000 shares.

RICHMOND STOCK MARKET.

COTTON MARKETS.

New York, September 19.—Apprehension of less favorable weather in the South seemed to be completely overdone, and reports of an easier spot situation in the cotton market to-day, and prices were very sharply under more active and general selling than has been noted for some time. The market was barely steady at a net decline of 1/8 to 1/16. The decline in the market was combined with reports of a very unsettled financial situation in Berlin, appeared to add to the con-
